Newtown, Kolkata, WB | +91 9593289993 | [Email](#) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Technical Skills

Core: TypeScript, JavaScript, React, Node.js, Express.js, MongoDB

Secondary: Next.js, Tailwind CSS, PostgreSQL, Python, Laravel

Backend & APIs: REST APIs, WebSockets, JWT Authentication

Tools: Git, GitHub, Postman, VS Code

Soft Skills: Team Collaboration, Critical Thinking, Adaptive Learning, Creative Problem Solving

Languages: English, Bengali, Hindi

Experience

Node.js Developer Intern: Webguru Infosystem Pvt. Ltd. — November 2024 to January 2025

- Developed and maintained RESTful APIs using Node.js and Express.js, integrated with MongoDB for efficient data management.
- Designed database schemas and implemented optimized CRUD operations to support core application features.
- Collaborated with frontend developers to integrate APIs, improving data flow and overall application performance.
- Identified and fixed bugs through debugging and code reviews, enhancing system reliability and stability.
- Managed codebase using Git, following structured branching and pull request workflows in a collaborative environment.

Education

BRAINWARE UNIVERSITY

Master of Computer Applications (MCA) | 84.20%

Barasat, WB

August 2023 - 2025

BRAINWARE UNIVERSITY

Bachelor of Computer Applications (BCA) | 90.82%

Barasat, WB

August 2020 - 2023

Projects

Subscription Management Application

TechStack: React.js, Node.js, Express.js, MongoDB, JWT | [GitHub](#)

- Built a full-stack web application to track and manage recurring subscriptions with secure user authentication.
- Implemented automated reminders and email notifications to help users avoid missed payments.
- Designed RESTful APIs and structured database schemas for efficient data handling and scalability.

Task Management Application

Tech: JavaScript, HTML, CSS, Node.js, Express.js, MongoDB, JWT | [GitHub](#)

- Developed a full-stack CRUD task management application with secure signup and login functionality.
- Implemented JWT and cookie-based authentication with protected routes and role-based access control.
- Built RESTful APIs and integrated rate limiting to improve API security and optimize request handling.

Hungry Campus – Canteen Management System

Tech: Laravel, PHP, MySQL, Blade, JavaScript, CSS | [GitHub](#)

- Built a web-based canteen management system to handle food ticket distribution and inventory tracking.
- Implemented real-time ticket validation and a centralized admin dashboard for monitoring sales and stock.
- Developed backend functionalities using Laravel and MySQL for efficient data management and CRUD operations.
- Reduced manual work by automating ticket sales and inventory tracking processes.
